APSIN Redesign Project RFP Issued

The Alaska Department of Public Safety issued a Request For Proposals (RFP) for the APSIN Redesign Project today. The RFP will remain open until November 9, 2001. Interested vendors must submit their proposals by the close date. The RFP is available for download from the State's Online Public website at <http://notes2.state.ak.us/pn/pubnotic.nsf> under the Department of Public Safety.

Briefly, the project is designed to redesign and implement a new criminal justice information system for the State of Alaska. The project is expected to span up to 5 years from award of contract to final delivery and project completion. A major requirement of the project is to insure that there is no interruption of services to Alaska's criminal justice community.

The project will result in providing Alaska with a modern, fast, reliable criminal justice system that should serve its citizens well for years to come.
